Hello, I am Dr. Jenifer Barker, State of Wisconsin Senior Track Veterinarian at Dairyland Greyhound Park from 1996 until 2010. I have a great deal of knowledge to share after practicing on thousands of racing greyhounds in my 14-year tenure at Dairyland. There is no doubt that our beloved greyhounds have unique medical issues not seen in other breeds.

After the closure of Dairyland Greyhound Park, I continue to volunteer my veterinary skills to several greyhound adoption groups. As more greyhounds are adopted into the community, greyhound owners and their veterinarians are seeking out more specialized information regarding greyhound care. Collaboration is the key to understanding the nuances of the breed and caring for these dogs. *I have created 4 Greyhounds Veterinary Service to fill that need.*

Services:

My goal is to identify the problem and advise you and your veterinarian of an appropriate treatment plan. Consultations by phone, email or house call.

This includes:

- Viewing X-rays, digital pictures or short video of your greyhound's problem via email or text.
- Reviewing blood work and medical records.
- Physical and lameness examination.

Health Issues Common in Greyhounds:

- Bone Cancer treatment options and pain control (Osteosarcoma)
- Blood work evaluation (normal and abnormal values in greyhounds)
- Diarrhea, bloody mucus stools, frequent cow pie stools
- Excessive bleeding after surgery or dental
- Eye Abnormalities
- Limping or lameness (old or new leg injuries)
- Lumbar back pain (LSS)
- Neck pain (Pinched nerve)
- Painful foot pad (Corns)
- Squeaky or Screaming Stomach
- Sudden paralysis of one or more limbs (Stroke)
- Swollen limb(s) occurring with no obvious injury
- Toenails breaking and falling off (SLO)
- Ulcerated and infected cuticles
- Ulcerated mouth and gums (CUPS)
- Urination difficulties in Males
- Vulvar fold infection in Females
- Parasite treatment (chronic hookworm, whipworm, nasal worm, Giardia)

Fee Schedule
